To Whom It May Concern

Khalifa Empowerment Program – AQDAR (Arabic for I Can) is an Emirati Empowerment Program that designs and provides awareness and training program to the community with special focus on education, woman empowerment, children safeguarding and disabled individuals empowerment.

We at SWGfL, a nonprofit organization, have worked with them in designing and implementing the eSafe School program. A framework designed to evaluate the UAE’s schools readiness to safeguarding their students from online risks.

The program which consists of 4 strands and 21 aspects that measure the school’s leadership, policy, infrastructure, technical readiness, education and training programs is implemented in most of UAE’s schools with plans for a nationwide deployment.

The program have raised awareness and supported UAE’s efforts in online safeguarding against bullying, cyber crimes, self harm and more.

Yours sincerely,

Ken Corish
Online Safety Director
